

PAC for Mercury Removal

Model: Mercarb- 500, Mercarb -800

Application:

PAC-Mercarb is a virgin coal based activated carbon, It s power in form. Its mesopore structure and low density makes it ideal to absorb the trace element containants onto the surface resulting in removal efficiencies of up to 99 percent.

Specification:

Mesh size:	-100mesh: 99%min. -325mesh: 95%min.
Moisture:	7%max.
Bulk Density:	0.30- 0.50g/cc
BET Surface area:	200 m ² /g min.
Iodine:	500mg/g min. or 800 mg/g min.

Packaging:

Material to be packed in black super sacks with 1100lb or 2200lb. net each

Remarks:

The above specification can be adjusted in accordance with the customer's requirement.
